SUMMARY

Final-year B.Tech IT student with internship experience in Backend Development and DevOps. Skilled in Node.js, Express.js, MongoDB, JWT authentication, Linux, Docker, Nginx, and AWS. Currently building a full-stack Consolidated Billing System for UPPCL. Seeking Backend/DevOps opportunities to contribute to scalable, production-grade applications.

EDUCATION

Bachelor of Technology in Information Technology

Sept 2023 – May 2027

Rajkiya Engineering College, Mirzapur | CGPA: 7.44

Intermediate (PCM)

April 2022 – April 2023

Rani Laxmi Bai Memorial School, Lucknow | 84%

EXPERIENCE

Backend & DevOps Intern | UPPCL — Uttar Pradesh Power Corporation Ltd.

June 2026 – Present

IT Division, Lucknow | Backend Development · Linux Server Administration · Nginx · MERN Stack

- Developing Consolidated Billing System (CBS) — a MERN stack internal web app aggregating daily payment data (Bank ID, Payment Gateway, Billing System) across UPPCL divisions; designed 25+ REST API endpoints with JWT auth (HTTP-only cookies), bcrypt hashing, and server-side validation.
- Architected MongoDB schemas for Users, Payment Submissions, Consolidated Reports, and Audit Logs; implemented RBAC (Admin/Uploader/Report User), CSV/Excel ingestion via Multer, and PDF/Excel report export.
- Administering Linux server environment, configuring Nginx as reverse proxy for internal deployment, and writing Jest & Supertest integration tests for full API coverage.

Software Engineering Intern | i2k2 Networks Pvt. Ltd.

Jan 2026 – Apr 2026

Noida, Uttar Pradesh | Cloud & Managed Services Company

- Worked in Linux-based environments using Git & GitHub for version control, branching, and collaborative backend code management across real-world SDLC workflows.
- Gained hands-on exposure to CI/CD pipeline concepts, Docker containerization, and AWS cloud infrastructure patterns in a professional DevOps engineering setting.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, C

Backend: Node.js, Express.js, REST APIs, MongoDB (Mongoose ODM), MySQL

Authentication: JWT, bcrypt, HTTP-only Cookies, Session Management, RBAC

Backend Libraries: express-validator, Multer, csv-parser, ImageKit, Jest, Supertest

Frontend: React 18, Vite, HTML5, CSS3, Tailwind CSS

DevOps & Cloud: AWS (S3, CloudFront, EC2, IAM), Docker, GitHub Actions (CI/CD), Nginx, Linux

Tools: Postman, Git, GitHub

PROJECTS

Consolidated Billing System (CBS) | React · Node.js · Express.js · MongoDB · JWT · Nginx

- Full-stack internal web app for UPPCL; RBAC with 3 roles, automated daily report generation, back-date correction, audit log, PDF/Excel export — to be deployed on UPPCL Linux server via Nginx reverse proxy.
- 25+ REST API endpoints, 4 Mongoose collections, JWT in HTTP-only cookies, Jest/Supertest test suite.

Static Website Deployment with CI/CD | AWS S3 · CloudFront · GitHub Actions | [GitHub](#)

- Deployed on AWS S3 + CloudFront CDN; zero-touch CI/CD pipeline via GitHub Actions on every push to main; HTTPS/TLS, IAM permissions, and caching configured for production-grade architecture.

Dockerized To-Do Application | Flask · Docker · Nginx | [GitHub](#)

- Containerized Flask app with Docker; configured Nginx as reverse proxy to simulate real-world deployment topology across environments.

CODING PROFILES

LeetCode: Rating 1515 | Top 39.66% [\[↗\]](#) **CodeForces:** Rating 696 [\[↗\]](#)

ACHIEVEMENTS & POSITIONS OF RESPONSIBILITY

- Class Representative — Coordinated between faculty and 60+ students; resolved academic and administrative concerns in a timely manner.
- Student Coordinator, Startup Spotlight (Skillancer Pvt. Ltd.) — Led end-to-end event logistics, participant engagement, and on-ground execution. [\[Certificate\]](#)
